AGENDA ITEM TRANSMITTAL

Hearing Date August 5, 2021	Subject Special Permit for New 100-Foot Tall Faux Water Tower	Contact Brian Millar, Contract Planner
--------------------------------	---	---

Project Description: The project is a Special Permit application proposing the construction of a new 100-foot tall faux water tower with ground-mounted equipment. The tower would be able to host up to three different wireless carriers.

Project Location: The project is located in the Arcata Bottoms area, on the north side of Foster Avenue, approximately 100 feet northeast from the intersection of Foster Avenue and Janes Road on the property known as Assessor Parcel Number 505-151-006.

Present Plan Land Use Designation: Residential Estates (RE) 2.5

Present Zoning: Agricultural Exclusive (AE) and Agricultural General (AG – proposed tower location)

Assessor Parcel Number: 505-151-006

Record Number: PLN-2020-16754

Environmental Review: Pursuant to CEQA Guidelines Section 15270 a project is exempt from CEQA if the project will be rejected or disapproved by a public agency. Staff is recommending denial of this project.

Major Issues: General Plan consistency

State Appeal Status: Project is not appealable to the California Coastal Commission.

AT&T (New Cingular Wireless), Use Permit
Record Number: PLN-2020-16754
Assessor's Parcel Number: 505-151-006

Recommended Action

1. Describe the application as part of the Consent Agenda;
2. Survey the audience for any person who would like to discuss the application;
3. If no one requests discussion, make the following motion to deny the application as part of the consent agenda:

Find that the Planning Commission has considered the project pursuant to the State CEQA Guidelines, finding that the project is exempt from CEQA review pursuant to Section 15270 of the CEQA Guidelines (projects which are disapproved); find that the project is inconsistent with the Humboldt County General Plan and deny the application for the AT&T New Cingular Wireless Special Permit.

Executive Summary:

Background

This item was considered by the Planning Commission at its July 15, 2021 meeting. After concluding a public hearing on the application, the Commission provided direction to staff indicating non-support of the project, and the agenda item was continued to the August 5, 2021 meeting where the Commission would take action on the project.

The proposed project consists of a Special Permit application for the construction of a new 100-foot tall, freestanding faux water tower, to be located on a concrete foundation and with ground-mounted equipment. The tower would be able to host up to two different wireless carriers inside the water tank area, and a third wireless carrier on the tower support structure legs. The tower facility would be located within a 40 x 45-ft ground-lease area, located approximately 60 feet north of the property line along Foster Avenue.

RECOMMENDATION:

Based upon the on-site inspection, a review of Planning Division reference sources, and comments from all involved referral agencies, Planning staff has found that, pursuant to CEQA Guidelines Section 15061(b)(4), a project is exempt from CEQA if the project is disapproved by a public agency (staff is recommending denial of this project); and that the applicant has not submitted evidence in support of making all of the required findings for approving the proposed 100-foot tall faux water tower per the Recommended Planning Commission Action.

Alternative: The Planning Commission could support of the proposed Special Permit if the Commission is able to determine that the submitted evidence supports making all of the required findings. However, based on this staff report, planning staff believes the submitted evidence does not support making all of the required findings and does not recommend further consideration of this alternative.

**RESOLUTION OF THE PLANNING COMMISSION
OF THE COUNTY OF HUMBOLDT**

Resolution Number 21-

Record Number PLN-2020-16754

Assessor Parcel Number: 505-151-006

Resolution by the Planning Commission of the County of Humboldt certifying compliance with the California Environmental Quality Act and denying the AT&T New Cingular Wireless Special Permit.

WHEREAS, New Cingular Wireless submitted an application for Special Permit to allow for the construction of a new 100-foot tall freestanding faux water tower to be located with ground-mounted equipment, with the ability to support three wireless carriers; and

WHEREAS, the County Planning Division finds that, pursuant to CEQA Guidelines Section 15270), a project is exempt from CEQA if the project will be disapproved by a public agency. Staff is recommending denial of this project; and

WHEREAS, the Humboldt County Planning Commission held a duly noticed public hearing on **July 15, 2021**; reviewed, considered, and discussed the application for a Special Permit; and reviewed and considered all evidence and testimony presented at the hearing. After concluding the public hearing, the Commission continued consideration of the application to its **August 5, 2021** meeting.

Now, THEREFORE BE IT RESOLVED, that the Planning Commission makes all the following findings:

1. FINDING:

Project Description: The proposed project consists of a Special Permit application for the construction of a new 100-foot tall, freestanding faux water tower, to be located on a concrete foundation and with ground-mounted equipment. The tower would be able to host up to three different wireless carriers. The tower facility would be located within a 40 x 45-ft ground-lease area, located approximately 60 feet north of the property line along Foster Avenue, and 45 feet from the west property line. The current use of the site is agricultural (grazing). Access to the tower facility would be from a gated all-weather gravel driveway connection to Foster Avenue, opposite its intersection with Janes Road. The tower would be 100 feet in height, using a freestanding lattice tower design, with the upper 24 feet of the tower having a faux water tank. The water tank would be 24 ft high (sitting between elevations 76 and 100 ft), and 17 feet wide, and constructed of a rustic-finish wood siding. Two of the wireless facilities would be mounted inside the faux water tank, while equipment for a third carrier could be placed on the tower support structure legs. The 40 x 45-ft ground-lease area would be enclosed with a proposed 6-ft tall chain link fence. The tower would be located in the fenced area, along with equipment cabinets and equipment pads, fuel tank and a standby future generator (will only run during routine testing or during an emergency loss of power).

EVIDENCE: a) Project File: PLN-2020-16754

2. FINDING: **CEQA:** The requirements of the California Environmental Quality Act have been met.

EVIDENCE: a) The County Planning Division, the lead agency, finds that pursuant to CEQA Guidelines Section 15270), a project is exempt from CEQA if the project is disapproved by a public agency.

3. FINDING: The proposed development is not in conformance with the County General Plan. Applicable Telecommunications Element provisions include:

EVIDENCE: a) §6.5 F: Design and Screening.
1)Support structures shall be designed and painted to minimize visibility with a preference towards each of the following in the order so listed: 1) use of existing structures, 2) stealth designs for concealment, and 3) monopoles.
2)Component parts, equipment cabinets, buildings and security fencing shall be designed to achieve a minimum profile through painting, screening, landscaping, and architectural compatibility with surrounding structures.
The project, while utilizing a faux water tank design, would result in placement of the proposed tower on a project site that contains no other structures. Additionally, the structure placement would be relatively close the Foster Avenue roadway (approximately 60 ft north), thereby increasing visibility of the tower.
3)Photo simulations or balloon tests with views from various vantage points shall be used to show visual impact of the proposed facility. Photo simulations were furnished in the attachments.

§6.5 E., Location and siting:

- 1)Avoid siting along ridgelines unless screened from public view
- 2)Avoid siting within views of scenic highways, public parks, recreation or cultural facilities or other public lands and coastal scenic or view areas
- 3)Setbacks shall be required between telecommunication facilities and residential dwelling units, public or private schools, and child daycare facilities.

The proposed tower would be located within approximately 400 ft of an off-site residence, and 550 ft to an off-site school and church (to the south). Combined with the proposed setback of approximately 60 ft from Foster Avenue, the project would have increased visibility to area residents, the school and church, as well as users of the Arcata Bottoms area.

§6.5 A: Tiered Permitting: "Utilize permit processes that vary depending upon the physical characteristics of the facility, its location, and its compliance with specific development and performance standards"

The project would be subject to compliance with County development standards and Use Permit conditions of approval for this project.

§6.5 B., Performance Standards: "Standards for siting design, visibility, construction impacts, on-going operation, and other characteristics that affect the compatibility and environmental and safety impacts of proposed facilities."

The proposed tower would be located within approximately 400 ft of an off-site residence, and 550 ft to an off-site school and church (to the south). Combined with the proposed setback of approximately 60 ft from Foster Avenue, the project would have increased visibility to area residents, the school and church, as well as users of the Arcata Bottoms area.

- b) The project complies with the County's Housing Element as it will not add to nor subtract from the County Housing Inventory. No housing is located on the project site, which is in agricultural use.

4. FINDING:

The proposed development is inconsistent with the purposes of the existing zone in which the site is located, and the proposed development conforms to all applicable standards and requirements of these regulations.

EVIDENCE:

- a) The project area is zoned AG and AE (with the proposed tower to be located on the portion of the site zoned AG).
- b) The project is subject to approval of a Special Permit pursuant to the County's zoning requirements. As noted herein, the required findings for approval of the Special Permit cannot be made.
- c) The proposed project is inconsistent with County policies and standards for new telecommunications facilities, including with respect to co-location of telecommunications facilities (more than three wireless carriers should be provided for to reduce potential for future placement of additional wireless towers in the Arcata Bottoms; and with respect to facility design (proximity to off-site residences, a school and church, as noted herein), combined with a nominal setback from Foster Avenue of approximately 60 ft.

5. FINDING:

The proposed development and conditions under which it may be operated or maintained will be detrimental to the public health, safety, or welfare; or materially injurious to property or improvements in the vicinity.

EVIDENCE:

- a) As noted above, the proposed project is inconsistent with County General plan policies and standards for new telecommunications facilities, including with respect to co-location of telecommunications facilities and facility design, and therefore, the required public health and safety findings cannot be made. The project proposes collation of two wireless carrier equipment groupings within the faux water tank, and a third carrier on the lattice

tower support legs; additional wireless carriers would be preferred to reduce future potential for placement of other wireless carrier towers in the Arcata Bottoms.

- b) The project is subject to approval of a Special Permit pursuant to the County's zoning requirements. As noted herein, the required findings for approval of the Special Permit cannot be made.

6. FINDING:

The proposed development does not reduce the residential density for any parcel below that utilized by the Department of Housing and Community Development in determining compliance with housing element law.

EVIDENCE:

- a) The project does not include any residential development.

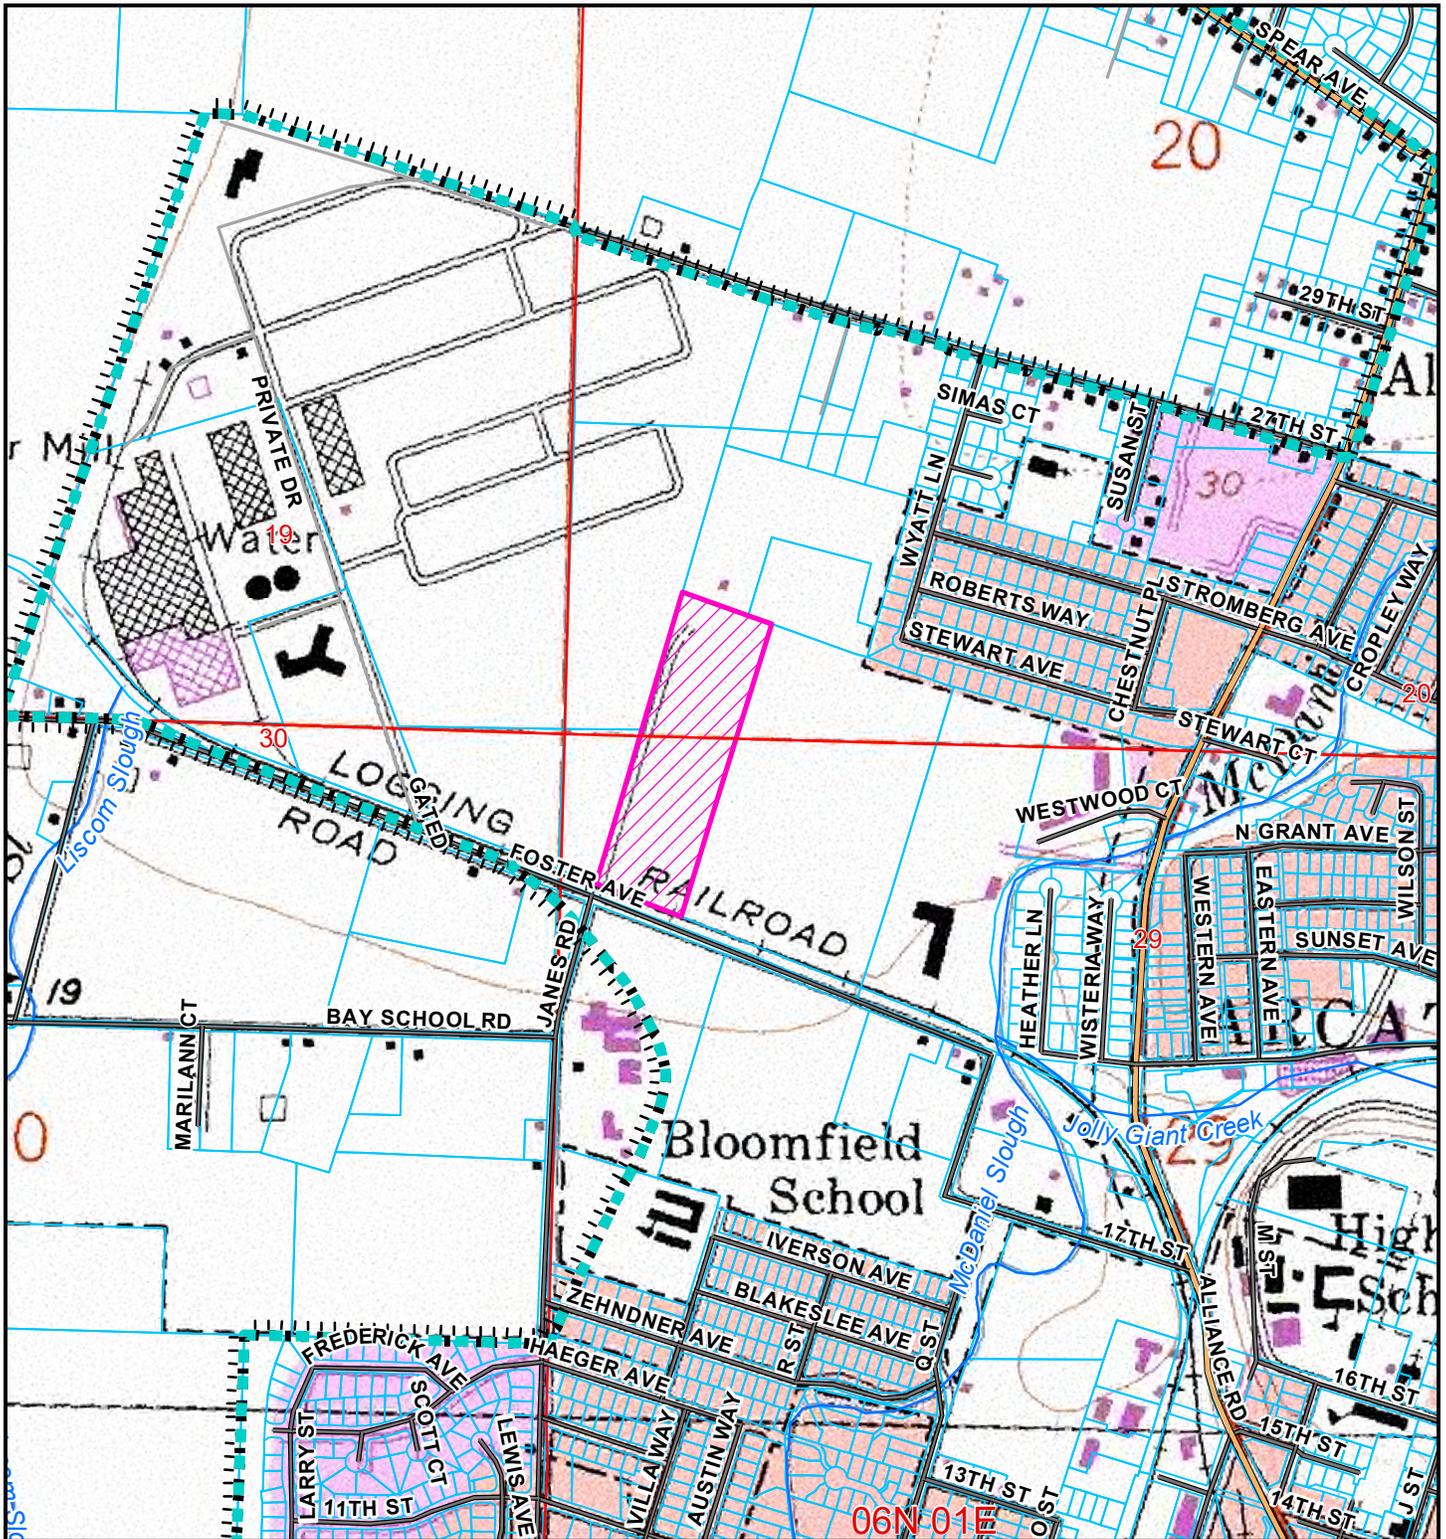

NOW, THEREFORE, based on the above findings and evidence, the Humboldt County Planning Commission does hereby:

- Adopt the findings set forth in this resolution; and
- Denies the Special Permit, based upon the Findings and Evidence described herein; and

Adopted after review and consideration of all the evidence on **August 5, 2021**

I, John H. Ford, Secretary of the Planning Commission of the County of Humboldt, do hereby certify the foregoing to be a true and correct record of the action taken on the above entitled matter by said Planning Commission at a meeting held on the date noted above.

John H. Ford, Director
Planning and Building Department

Public Comments**

We, the undersigned, are in favor of the AT&T submittal for the cell tower proposed on the Butler property at Janes and Foster roads. We approve of the location and water tower concept which fits in well with the agricultural setting. We request approval from the planning commission for this AT&T cell tower for the benefit, convenience, and safety of the community residents and visitors of Arcata Bottoms.

We, the undersigned, are in favor of the AT&T submittal for the cell tower proposed on the Butler property at Janes and Foster roads. We approve of the location and water tower concept which fits in well with the agricultural setting. We request approval from the planning commission for this AT&T cell tower for the benefit, convenience, and safety of the community residents and visitors of Arcata Bottoms.

Parcel Number: 505-151-006

Record Number: PLN-2020-16754

Topic: AT&T Cell Tower

I am in favor of the AT&T cell tower coming to Humboldt County. I fly planes into the Humboldt Country area from time to time and often experience poor reception (sometimes none at all). I feel that this is a great addition to the Arcata / Humboldt County area for first responders, visitors, and the general community. I ask you to consider and approve the development of the tower at the intersection of Foster and Janes Road on the FAUX water tower.

Thanks,

Andrew Gonzales

Subject: Proposed AT&T Cell Tower on Foster & Janes

Record 2020-1675
Parcel 505-151-006

To Planning Commission --

I am requesting that the Planning Commission approve the AT&T Cell Tower proposal near the intersection of Foster Avenue and Janes Road.

I frequently visit Humboldt County and frequently experience 'no service' and dropped calls on my cell phone with AT&T service in Arcata. The proposed Cell Tower should improve service coverage in Arcata.

In addition, the cell tower design fits well with the agricultural land.

Subject: Communication towers in Arcata (ATT proposed site # 202016754)

Communication is an important element of business - emergency needs- learning& most private and public identities. I support the need for communication and I believe the "water Tower" proposed site by ATT design fits our community far more aesthetically then the other purposed tower! I like the fact there is no subdivision close and that the area chosen for the ATT Water Tower site is free of employees & commercial business.

Make the right choice and choose the proposed Water Tower as the new communication tower site!

A concerned Arcata citizen.

Debbie johnson

Gentlemen:

This is in regard to a proposed AT&T project at the above listed address.

Let this email show that I am totally in favor of AT&T's procurement in the Arcata Bottoms. This is long overdue. There are too many dead spots that need cell service, especially in emergencies.

Very truly yours,

Denise D. McNulty
Concerned Citizen

I grew up in Humboldt County. I travel there often between Lincoln to Arcata, to visit relatives. There are many gaps in cell phone reception. There is a need for better cell coverage. I hope you welcome ATT into the community. Thanks. Gayle Bear

Regarding: PLN-2020-16754, Parcel # 505-151-006

I am the daughter Shirley Butler who is property owner of the proposed AT&T cell site proposal.

I wish to call your attention to inaccurate information in the Planning Commission report related to cell towers in Arcata bottoms, specifically, page 73 of 124, Alternate Site Analysis, Butler Site on Foster Avenue. This page was prepared by PWM and rejects the competing AT&T site proposal for various reasons but the picture and associated annotations are NOT of the Butler property.

Further, I am aware of several other pages in the report prepared by PWM that state that the owners are not interested supporting a cell tower on their properties. In fact, I have the spoken to many of those property owners and they state they have never been contacted. This raises question as to the veracity of other information presented by PWM in that report.

If this is of concern to you please contact me and I am able to provide you with details of many other discrepancies and misinformation in the PWM presentation.

Thank You,

Karen Sacchi

From the Giuntoli's, 1264 Warren Creek Road, Arcata CA 95521

7/28/2021

Dear Planning Commission,

We are Paul and Carla Giuntoli. Paul was born in Arcata and has worked in the the Arcata Bottem agriculture scene his entire life. He is the owner of the ranch at 1171 Mad R. Road. You may know it as the pumpkin patch!

The cell tower project should be awarded to ATT because they picked the Butler property as the best location after their research, and because the Bottems needs cell coverage ASAP, and ATT is ready to roll.

The lack of coverage really hurt parents during COVID. Try working from home, or home schooling your kids without internet service.

The lack of service compounds the problems agriculture faces, with younger people leaving the farm, labor shortages and farm succession. Young people are not happy without the internet, and move to town.

Safety-wise, tourists from all over the world use our beaches and the Hammond Trail. If the land-line goes down for any reason, without cell service it is over 4 miles from Mad R. beach to Hwy 101. Residents of Mad R. Road are well aware of their risk should they need 1st responders of any kind. If there is an industrial accident, fire, heart attack, need for law enforcement etc. the situation could be life threatening.

Thank you for your consideration of our opinion.

Please consider this e-signed by Paul Giuntoli and Carla Giuntoli

Re: parcel #505-151-006
Record # PLN-2020-16754

I understand that there are controversial issues over this tower. Being an R.N. in this country for over 20 years, I think it is crucial for all persons to have 911 access with their cell phones. No coverage, no access. Please consider all environmental issues, including cell tower height.

Thank You,

Rosalyn Trautman

Hello,

We are emailing concerning the future plans of the AT&T Cell Tower Parcel Number 505-151-006 and Record Number PLN-2020-16754. Our family is highly in favor of the new service coming to the Humboldt County area. We have been a customer with AT&T for 25 years and will continue to be! We currently reside in Houston Texas however we often travel to the Humboldt County area to visit our family and quite frequently we have issues with the cell phone reception. We strongly support and believe an additional carrier to the community would greatly benefit the residents of Humboldt County. Please take into consideration the cell phone tower at Foster and Janes Road as it's extremely important for the safety of your residents and first responders. In addition, it will improve the cell phone reception and provide faster streaming coverage to customers!

Thank You,

Tricia Gonzales
Manny Gonzales

I accept AT&T Water Tower cell !!
Project # PLN-2020-16754

7.29-2021

I am Dave Lindstrom, I have been fishing for over 40 years. I need ~~for~~ better reception off the coast. I employ four(4) crewmembers. Our cell service is bad. If our radio goes down that is all we have for emergencies. on our coast line, it is terrible.

I have been involved in the Salmon Drag Strip ~~for~~ since 1954. We also need cell service. So please think of us. Accidents happen.

We need AT&T to fill our service!

Please approve AT&T into our area. We need to fill the gaps.

A cell ^{tower} tower is excellent. The site is great.

Bring AT&T to help us, Fisherman and The Drag Strip. Don't forget us please.

AT&T Cell Tower Project

Project # PLN-2020-16754

I am Shirley Butler, owner of the ranch of AT&T's proposal sit.

This has been quite a journey for me since I am ninety nine (99) years of age.

AT&T has been working with me on this project for over two years. They kind and considerate.

Many of my friends and long time ranchers need AT&T. On the bottoms, those who have AT&T service need better reception, including tourist and first responders, students and our community. I have a friend whos house almost burnt down as her land line was burned and her AT&T cell was in a gap and no service at that time. This can happen to anyone.

Please vote to continue AT&T service.

Sincerely,
Shirley Butler

We, the undersigned, are in favor of the AT&T submittal for the cell tower proposed on the Butler property at Janes and Foster roads. We approve of the location and water tower concept which fits in well with the agricultural setting. We request approval from the planning commission for this AT&T cell tower for the benefit, convenience, and safety of the community residents and visitors of Arcata Bottoms.

Project # 16754
at&t all project.

I am writing in behalf of my mother Shurly Butler.

I would like to inform the commit that Mrs Butlers property is in the wet zone.

However the geese and ducks fly from the north to the west of us. Mrs Butlers property is in the highest elevation of Arcata Bottom. As the geese and wildlife fly down the settle as I stated to the bogs of water west of us and into Sisco's Slough, that branches off into three divisions. From their the end up at the bay.

The only birds on this property were raised by my father Harold Butler in the 70's and 80's. They were pheasants - Please welcome AT&T.

Respectfully,
Helen C. Sacchi
