Subject: AT&T Cell Tower

Arcata Planning Department

July 28, 2021

I am writing requesting you to consider expediting the proposed AT&T Cell Tower project on the Arcata Bottoms as rapidly as possible.

Cell phone reception north of Trinidad is almost nonexistent even as close to Trinidad as Larrupins Restaurant. During a winter storm two years ago, I was blocked in my home by fallen trees and no phone service for several weeks. Living alone as a senior citizen with some medical issues does have its challenges, but reliable access to communication does not need to be one of those challenges. On another occasion several years ago when I was much younger, there was also a serious problem when fire trucks arrived to help extinguish a fire at my home and had difficulties with access to communications. Therefore I am urging the Arcata Planning Department to provide whatever assistance possible to expedite a solution to this problem.

Respectfully yours,

Dr. Jean Heard Bazemore,

3252 Patricks' Point Drive,

Trinidad
