Project Description: Re-issuance for a 15-year term of a previously approved Conditional Use Permit, Surface Mining Permit and Reclamation Plan for the extraction of instream river-run aggregate from exposed gravel bars located in 14 parcels along the Van Duzen River at the mouth of Yager Creek. The original permits approved the following: "the annual extraction of up to 100,000 cubic yards (yd3) of river-run sand and gravel aggregate products from a three-mile stretch of the Van Duzen River near its confluence with Yager Creek. The extraction method will be "bar-skimming" --- where the upper portion of exposed point bar materials is scraped horizontally to a depth no less than one foot above the elevation of the live stream. Mined materials will be transported to five stockpiling sites where they await further transport to other sites for processing. No on-site processing (e.g., washing, size-sorting and crushing) is proposed for on-site.
