The Public Health Laboratory Information Management System includes functionality for security, specimen processing, results processing, reporting inquiry and customer service.

DHHS - Public Health has utilized the current Public Health Laboratory Information Management System since 2009 and has a long-established relationship with Common Cents Systems, Inc. It is also recommended that the Board authorize the DHHS - Public Health Director, or a designee thereof, to execute any and all subsequent amendments to the attached professional services agreement, after review and approval by County Counsel, Risk Management and the County Administrative Office, in order to avoid delays in the provision of needed software maintenance services.
