A 15-year extension of the Reclamation Plan (SMR-06-91X, SMP-06-91X) for the existing in-stream operation on Emmerson Bar. A vested rights determination was made in 1992 for the annual maximum extraction of 50,000 cubic yards of flood-washed aggregate from the exposed bar surface downstream of the Mad River Bridge on Hatchery Road near the City of Blue Lake. All extraction occurs on the exposed gravel bar. No changes to the vested mine nor to the adopted reclamation plan are proposed.
