DISCUSSION:

During the months of August, September and October, Trinity County has experienced severe wildfires in the Ruth Lake area that has caused extensive property damage, destruction and environmental harm. The August Complex fires have caused loss of dwellings, personal property, infrastructure, forest and vegetation throughout the area. This destruction poses environmental threats to the water quality in Ruth Lake which needs to be addressed to minimize or eliminate contamination of Ruth Lake and the Mad River. These water sources provide drinking water for approximately 88,000 residents in Humboldt County. Therefore, the Board of Supervisors is requesting federal and state resources to address watershed restoration at Ruth Lake and Mad River.
