SOURCE OF FUNDING:

Public Health (1175)

DISCUSSION:

Using tobacco products has a substantial negative impact on health. In Humboldt County, tobacco smoking causes or contributes to 34% of all deaths. Since 1989, the California Department of Public

Health (CDPH), California Tobacco Prevention Program (CTPP) - formerly known as the California Tobacco Control Program - has served the people of California with a comprehensive tobacco control program.

CTPP is committed to reducing tobacco disparities among populations disproportionately impacted by tobacco industry predation. In November 1988, California voters approved the California Tobacco Health Protection Act of 1988, also known as Prop 99. This initiative increased the state cigarette tax by 25 cents per pack and added an equivalent amount of tax on other tobacco products. California voters created a strong mandate for CTPP to reduce tobacco-related disparities when they overwhelmingly approved the California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (“Proposition 56”). Proposition 56 added a \$2.00 tax per cigarette pack and a proportional increase to other tobacco products beginning in April 2017. Proposition 56 additionally requires that at least 15 percent of these tax funds appropriated to CTCP be designated for accelerating and monitoring declines in tobacco-related disparities.

Historically, Proposition 56 and Proposition 99 funding received by the county created and supported the Tobacco-Free Humboldt (TFH) Program and Tobacco Education Network (TEN). The last allocation of this kind was brought before your board and accepted in 2017 for fiscal years 2017 through 2021. Today, funding is used to maintain the TFH Program through the Department of Health and Human Services, Public Health Branch, Healthy Communities & WIC Division. The TFH program plays a leading role in creating smoke-free environments throughout the county by coordinating and supporting policy and systems-level changes to reduce exposure to secondhand smoke and to build support for a lifestyle free from nicotine addiction. By engaging citizens, community leaders, and policymakers to build community norms that improve health outcomes, the program creates smoke-free cities, smoke-free multi-unit housing, and improved access to healthy products in retail environments throughout Humboldt. TFH also increases the availability and awareness of tobacco cessation resources through direct service and technical assistance to service providers, supporting healthy lifestyle choices for individuals who choose to improve their health by going smoke-free. The TFH Program recently brought before your board a comprehensive Tobacco Retail License Ordinance.

This item comes late to the Board today due to delays in state notifications and the release of official documentation.
