A Special Permit for an existing 9,000 square feet of outdoor medical cannabis cultivation. A Special Permit is also sought for an encroachment within in a Streamside Management Area (SMA), for structure removal and stream channel restoration and revegetation. Water for irrigation is sourced from a permitted non-hydrologically connected well with a maximum flow rate of eight gallons a minute as well as two points of diversion. A Special Permit is also being sought for the ongoing use and maintenance of the diversions within the SMA. Water is and will be stored in tanks with a total capacity of 106,400 gallons. There are eighteen existing tanks totaling 46,800 gallons and a proposed 59,600 gallons in 16 additional tanks for water storage. The Applicant estimates that 120,000 gallons of water is required for the annual operations. Processing on-site is limited to drying and curing and will occur in a facility for drying, trimming, and storage needs on the farm. Processing will be done off-site. There will be two permanent employees and the owner / manager. In addition, there will be one to three seasonal part time employees when needed. Power is sourced from a solar array and a generator. The applicant proposes to expand the solar system within two years so it can provide as primary power source for the project. A small Honda generator will remain on site for emergency purposes only.
