McKinleyville Community Services District proposes to install a 65,000 sq. ft. ground mounted solar array micro-grid as part of their MCSD Wastewater System Energy Efficiency and Renewable Energy Project. The microgrid would be located within the pond 5 basin of the wastewater treatment plant and would generate 500kW of power. No power would be exported off site and would be utilized by the wastewater treatment plant (WWTP). Work is expected to occur over a six-month period commencing in June 2021. Work hours would be Monday-Friday 7:00 a.m. to 7:00 p.m. and possibly an occasional Saturday. Vegetation removal involves the removal of tule and cat tails that were planted in the pond 5 basin in 2016.
