SOURCE OF FUNDING:

Federal funds (HAVA funds) administered by the U.S. Election Assistance Commission.

DISCUSSION:

Under the Help America Vote Act (HAVA), VoteCal was implemented to provide a single, uniform, centralized voter registration database that meets HAVA requirements. VoteCal connects the Secretary of State and all 58 county elections offices together into a single, official statewide database of voter registration information to improve the voter registration process.

The purpose of HAVA funding in the amount of \$25,000 under Agreement No. 18G27112 is to assist with efforts to improve cyber security and infrastructure related to VoteCal (Attachment 3). Funding may be used for conducting security assessments, third-party software and/or hardware specifically related to improving the county's cyber security capabilities related to VoteCal, consulting services and

associated information technology installations directly relating to cyber security risks, privacy and awareness training for elections staff, physically securing servers hosting the county's Election Management System, updating and hardening servers, improvements to security practices and documentation, and monitoring system and applications.

FINANCIAL IMPACT:

Funding of \$25,000 provided through the HAVA for cyber security assists the Office of Elections with funding that may be used to conduct assessments, and secure software and hardware to increase cyber security. The Grant Agreement, No. 18G27112, requires a dedicated fund be created for these funds. There is no direct impact on General Fund.

STRATEGIC FRAMEWORK:

This action supports your Board's Strategic Framework by providing community-appropriate levels of service.

OTHER AGENCY INVOLVEMENT:

U.S. Election Assistance Commission
California Secretary of State
Humboldt County Auditor

ALTERNATIVES TO STAFF RECOMMENDATIONS:

The Board could choose not to approve this grant. This alternative is not recommended as these grant funds will help the Elections Office improve cyber security and other security practices.
